CASE STUDY

Portfolio Category: **Education & Arts**

Project Code: **PS140678**

Goal

Great Blessings Schools (GBS) had an outdated and nonfunctional website. They needed a modern, functional and aesthetically pleasing redesign of the school's website from the ground up. The go-to-choice to bring that into reality was no other than Paruto Solutions Ltd. The purpose of the proposed website were clearly stated and requirements were well documented. It was necessary that the final solution succeeded in bringing to light the three sections of the school, namely; preschool, elementary and high school. With the vision clearly spelt out, Paruto Solutions swung into action to provide a one-of-a-kind design and solution for the web project.

Solution

A robust, elegant and functional design was proposed to the client and the project development commenced. As a principle for our organization, we understand there is a no one-size-fits-all solution to meeting the needs of our clients' projects. Thus, we deployed an agile approach that is able to cater for ongoing design and development changes. We ensured the scope statement and project requirements covered all the intended use case and met the proposed performance indices the client expects from the project.

We find out that this agile approach to projects always serve our clients' needs 100% of the time. For this project, we were able to put together a roadmap that excited GBS and it proved to be a viable solution. The website was built to be responsive, scalable, secured, aesthetics and more!

Outcome

As with all our projects, this project was delivered as planned and met all the agreed requirements captured during the planning phase of the project. We made it and birthed GBS. Again, Paruto Solutions Ltd did it!

Paruto Solutions
...think possibilities!
