## CASE STUDY

Portfolio Category: **Business-to-Business (B2B)**

Project Code: **PS120868**

### Goal

Pavilion Business Solutions Ltd needed a website that presented in a compelling and convincing manner, its services, products and solutions. The go-to-choice to bring that into reality was no other than Paruto Solutions Ltd. The purpose of the proposed website were clearly stated and references as to the sort of quality required for the website were given. It was necessary that the final solution succeeded in amplifying Pavilion Business Solution's services in a way like never before. With the vision clearly spelt out, Paruto Solutions swung into action to provide a one-of-a-kind design and solution for the web project.

### Solution

A robust, elegant and functional design was proposed to the client and the project development commenced. As a principle for our organization, we understand there is a no one-size-fits-all solution to meeting the needs of our clients' projects. Thus, we deploy an agile approach that is able to cater for ongoing design and development changes. We try to ensure from the project requirements gathering, all possible scope is covered as to the intended performance the client expects from the project. This agile approach to projects have always served our clients' needs 100% of the time. For this project, we were able to put together a roadmap that excited PBS and it proved a viable solution to all their stated needs. The website was built to be responsive, scalable and secured. In addition, was paid to boosting the aesthetics and appeal of the website.

### Outcome

As with all our projects, this project was delivered as planned and met all the agreed requirements captured during the planning phase of the project. We made it and birthed PBS. It is safe to say, Paruto Solutions Ltd did it!

**Paruto Solutions**  
...think possibilities!
